# Science Undergraduate Laboratory Internshipstonal Laboratory

### Providing real-world scientific and technical experiences

The SULI program provides:

- Access to expert scientist and world class research facilities
- Authentic research
  experiences
- Research programs not available in universities or industry

The Science Undergraduate Laboratory Internship (SULI) program encourages undergraduate (2-year and 4-year) students to pursue science, technology, engineering, and mathematics careers by providing research experiences at a Department of Energy (DOE) laboratory.

## Program Overview

The SULI program provides interns the opportunity to work under the guidance of scientific and engineering staff on projects that are relevant to the DOE mission of ensuring America's security and prosperity by addressing its energy, environmental and nuclear challenges through transformative science and technology solutions that includes:

- 16 week internship programs during the spring and fall semesters
- 10 week internship program during the summer
- Participation in cutting-edge scientific research programs
- Receive a weekly stipend of \$600
- Chance to present research results verbally and/or in writing
- Work may appear in a contribution to a scientific journal
- Participants living outside a 50-mile radius from the lab will be provided on-site housing and one round trip visit to their listed permanent address

Brookhaven National Laboratory delivers discovery science and transformative technology to power and secure the nation's future. Primarily supported by the U.S. Department of Energy's (DOE) Office of Science, Brookhaven Lab is a multidisciplinary laboratory with seven Nobel Prize-winning discoveries, 36 R&D 100 Awards, and more than 70 years of pioneering research.

### **Research Areas**

#### Biology

Environmental and Climate Sciences Nuclear Science Technology Nonproliferation and National Security Nuclear & Particle Physics Superconducting Magnet Nanomaterials Chemistry Condensed Matter Physics & Materials Science Sustainable Energy Technologies Computational Sciences Facilities Management Safety Management Waste Management

### **Research Facilities**

Relativistic Heavy Ion Collider National Synchrotron Light Source II Center for Functional Nanomaterials

### **Eligibility Criteria**

Currently enrolled full-time at an accredited U.S.institution AND have completed at least one semester as an undergraduate (at the time of application)

- At least 18 years of age
- U.S. citizen or legal permanent resident
- Minimum GPA of 3.0

# Application

Apply online at https://science.osti.gov/wdts/suli/How-to-Apply
